Salem Radey

salem.radey@wisc.edu | https://salemradey.github.io/

Education

University of Wisconsin - Madison — Madison, WI
Master of Science in Computer Science — *Sept. 2024 – May 2026*

University of Wisconsin - Whitewater — Whitewater, WI
Bachelor of Arts in Game Development, Minor in Computer Science, Minor in Japanese — *Sept. 2018 – May 2022*

Experience

Research Intern — Jun. 2026 – Current
UW-Health — *Madison, WI*

- Calibrate and conduct eye tracking data collection while Radiology technicians read breast imaging
- Contribute as an author to medical research publications
- Facilitated the creation of pipelines for data analysis

Security Research Assistant — Jan. 2025 – May 2026
UW-Madison WI-PI Research Group — *Madison, WI*

- Navigated large (200,000+ files) code bases consisting of Java and JavaScript
- Used static and dynamic analysis to reverse engineer social networking apps such as *Pinterest*, *X*, and *Instagram*
- Utilized large-language models to assist in large scale data analysis

IT Support Specialist — Aug. 2025 – Oct. 2025
UW-Madison DoIT Center — *Madison, WI*

- Provided technical support via phone to a userbase of almost 50,000 students and faculty
- Utilized a knowledge base and ticketing system to resolve a variety of different software issues
- Experience working with sensitive data

Publications

Challenges and Future Directions in Agentic Reverse Engineering Systems — 2026
***Salem Radey**, Jack West, Kassem Fawaz*

- Study of the current capabilities and limitations of agentic AI for reverse engineering tasks, and discussion of potential future directions for research in this area.
- Accepted to IEEE S&P workshop, SAGAI

Android Reverse Engineering Paper (currently under review) — 2026
*Jack West, Leo Cao, **Salem Radey**, Kassem Fawaz, Suman Banerjee*

- Utilized the Android Debug Bridge and a rooted phone connected to a Linux machine to extract data pertaining to common android apps
- Conducted static and dynamic reverse engineering techniques to analyze cryptographic libraries of top social media apps on android
- Scripted in Python to collect data logs of app cryptographic activity, automatically translate to ASCII, and write to file
- Submitted to a tier 1 conference for 2027

Student Papers

Theft & Stalking: Current Bluetooth Low Energy Tracking Device Capabilities 2026
Salem Radey

- Overview of current Bluetooth tracking device adherence to DULT protocols according to data publicly available to the consumer.
- Submitted for CS 782 (Advanced Computer Security and Privacy) final project.

Technical Skills

Computer Languages (in order of proficiency): C, C++, c#, Python, Java, JavaScript
Speaking Languages (in order of proficiency): English (native), Japanese (approximately JLPT N4-N3)
Developer Tools: Git, Docker, VS Code, ADB, JADX, Frida, JupyterLab
